'*Another Green World* is an album that ties together various styles and musical ideas in a brilliant way. Our record label has the same eclectic approach. About Retro Retry

The Retro Retry cd's follow a unique concept with multiple acts cover a record in its entirety. The listener hears an interpretation of a complete record, instead of a random collection of covered tracks. In 2005 the first edition of Retro Retry was released. On this release ten Dutch bands covered the Sonic Youth record *EVOL* (1986). Among the bands were zZz, Gone Bald, Pfaff, Blues Brother Castro and Fine China Superbone.
